

Optimized Efficiencies with a Global MSP Technology Program

Client Situation

A top 20 global technology company needed to enhance performance and optimize the efficiency of its contingent workforce. The client was looking for a comprehensive assessment of their contingent workforce sourcing program. With over 4,500 suppliers in place globally, managing and evaluating them became an impossible task.

Solution

TAPFIN was selected to implement a global MSP program for the company's 17,000 contractors. The solution included a thorough assessment of all contingent workforce vendors and an analysis of the supporting systems and business processes. We also oversaw the global implementation and ongoing program management of a customized Vendor Management System (VMS), including process oversight and systems administration.

Results

- 6% annual contingent labor savings
- 15% improvement in the time-to-fill
- Elimination of 3,400 underperforming vendors

"BY STREAMLINING A LEADING TECHNOLOGY COMPANY'S CONTINGENT LABOR PROGRAMS, TAPFIN ENHANCED PERFORMANCE AND OPTIMIZED EFFICIENCIES IN OVER 50 COUNTRIES AND REDUCED THE NUMBER OF SUPPLIERS BY OVER 75%."
